

# Pres-Seal Sealant

Sales - kurt@pres-seal.com

## What is PRES-SEAL?

Pres-Seal is a versatile extruded sealer used to seal joints and casing and ductwork. Designed for fast, economical, and high-temperature sealing, Pres-Seal is available on paper tape. Just press it to your surface and remove the tape.

## Where Can I Use It?

Pres-Seal is ideal for metal surfaces such as boiler doors, access openings, cyclone doors and pulverizer doors, as well as sheet metal. Pres-Seal is versatile and will adhere to most clean, dry surfaces and is commonly used on warped and irregular surfaces, especially flanges.

## How Do I Apply It?

Apply Pres-Seal by hand or putty knife to clean surfaces. Use more than one bead on warped or distorted surfaces.

## 1/2" Technical Product Info

\*Flash Point > 500°F

\*Temperature Range: 24 hrs. @ 290°F, No deterioration. 30 days at 0°F, No deterioration.

\*Penetration - 90-120 300 Cone per ASTM D-217

\*Fire Resistance - <15 sec. per MIL-S-17377D

FMVSS 302 SE/O

\*Stays flexible through freezing and thawing

\*Non-Corrosive & Non-Oxidizing

\*Non-Toxic
