

Pres-Seal Sealant

Sales - kurt@pres-seal.com

What is PRES-SEAL?

Pres-Seal is a versatile extruded sealer used to seal joints and casing and ductwork. Designed for fast, economical, and high-temperature sealing, Pres-Seal is available on paper tape. Just press it to your surface and remove the tape.

Where Can I Use It?

Pres-Seal is ideal for metal surfaces such as boiler doors, access openings, cyclone doors and pulverizer doors, as well as sheet metal. Pres-Seal is versatile and will adhere to most clean, dry surfaces and is commonly used on warped and irregular surfaces, especially flanges.

How Do I Apply It?

Apply Pres-Seal by hand or putty knife to clean surfaces. Use more than one bead on warped or distorted surfaces.

1/4" Technical Product Info

*Designed to fill gaps and holes where fire resistance is required

*Penetration - 8 to 11MM 300 gm cone per ASTM D-217

*Stays flexible at ambient temperatures

*Non-Corrosive, Non-Oxidizing, Non-Curing

*Non-Toxic
