

# 1/4" Pres-Seal

## Heat Resistant Mastic Sealant

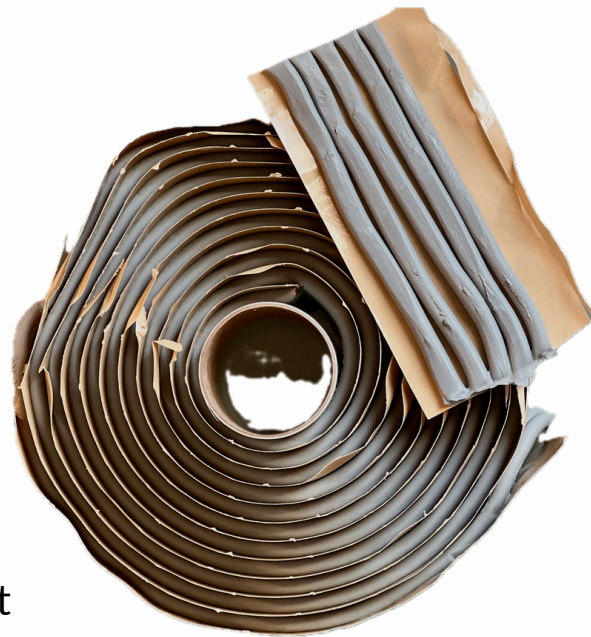

Pres-Seal is a versatile extruded mastic sealant that delivers reliable, economical sealing for industrial applications. With over 50 years of proven performance, our sealant is trusted by leading companies in power generation, marine, and industrial filtration.

## Key Benefits

- Non-corrosive & non-oxidizing
- Self-extinguishing properties
- Easy peel-and-stick application: Simplifies installation with a user-friendly adhesive backing
- Stays flexible at ambient temperatures: Retains pliability and performance in normal environmental conditions

## Ideal Applications

- Boiler doors and access openings
- Case and duct systems
- Heat exchangers
- Sheet metal joints and irregular surfaces
- Dusty/Dirty Environments
- Material processing and grinding
- Foundry operations / Wood processing
- High-temperature applications / Combustible Dust
